### **3.6 Intended Nationally Determined Contribution (INDC) to United Nations, and COP21 : Paris Agreement by Representative from Office of Natural Resources and Environmental Policy and Planning (ONEP)**

Dr. Phirun Saiyakitpanich, Director, Climate Change Management Coordination Division from Office of Natural Resources and Environmental Policy and Planning (ONEP) presented the COP21: Paris Agreement and Intended Nationally Determined Contribution (INDC). His content is shown in detail below:

The COP21 in Paris has culminated with the adoption of a historic agreement on climate change. The Paris Agreement aims to keep temperature rise below 2°C, and to achieve net-zero emissions within the year 2030. The final agreement includes the provision of finance (at least US\$ 100 billion per year) from the developed countries to support the developing countries in the transition towards low greenhouse gases and climate resilient development. Thailand has established the greenhouse-gas emission mitigation goal in percentage in the range between 20-25% in the case of Business as Usual (BAU) to be achieved by the year 2030. The key elements of the COP21 are consisted of:

- Adaptation – strengthening ability of countries to deal with climate impacts.
- Mitigation – reducing emissions fast enough to achieve the temperature goal.
- Transparency and global stocktake – accountable for climate action.
- Capacity building and Education– strengthening ability to recover from

climate impacts.

- Support/ Finance – to support and build clean technology and resilient futures.

The INDCs is a term used under the United Nations Framework Convention on Climate Change (UNFCCC) for reduction in greenhouse gas emissions. The INDCs mean for governments to communicate internationally the steps that will take to address climate change in their own countries, the INDCs will reflect each country’s ambition for reducing emissions, taking into account its domestic circumstances and capabilities. The concept of Thailand’s INDCs is known for:

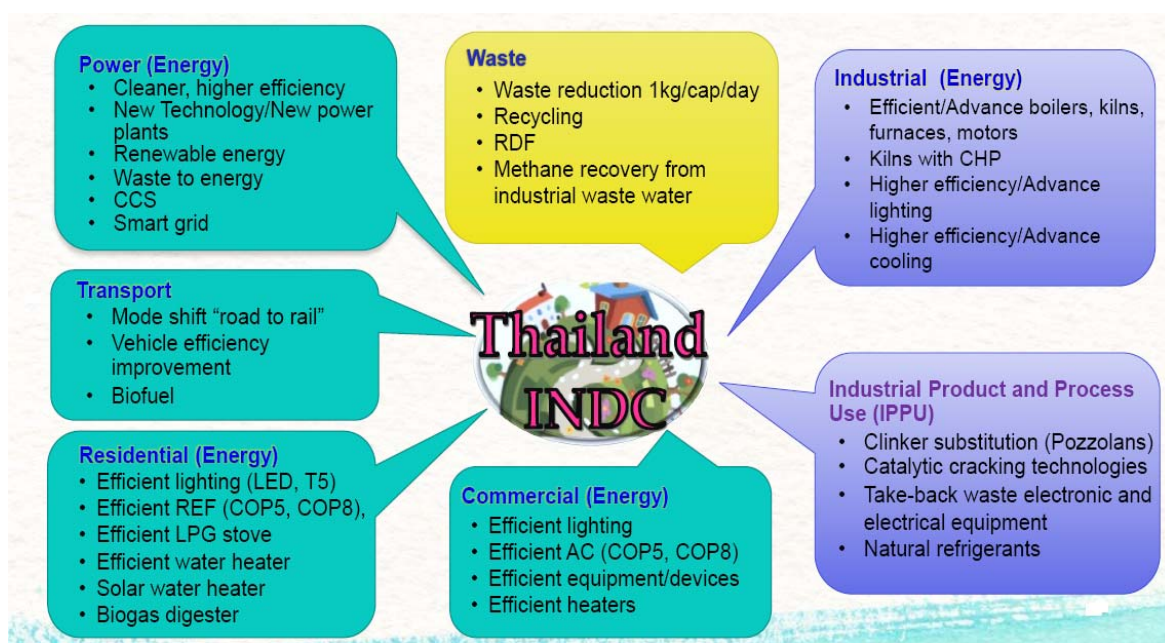

- Consistent with the philosophy of Sufficiency Economy and the principle of sustainable development
- Integrate and further develop national policies and plans
- Focus on a map powered by governmental support and lead to an operational reality
- Further operations in the NAMAs. (Nationally Determined Mitigation Action)

Thailand's INDCs was formulated based on the following plans already approved or in the pipeline for approval by the Cabinet, the content is shown in detail below:

- National Economic and Social Development Plans
- Climate change Master Plan B.E. (2015-2050)
- Power Development Plan B.E. (2015-2036)
- Thailand Smart Grid Development Master plan (2015-2036)
- Energy Efficiency Plan B. E. (2015-2036)
- Alternative Energy Development Plan B. E. (2015-2036)
- Environmentally Sustainable Transport System Plan B.E. (2013-2030)
- National Industrial Development Master Plan B.E. (2012-2031)
- Waste Management Roadmap
- Environmental quality management

The summarize of activities to achieve Thailand's INDCs
